Re: **Carter Truck Service Bodies**

Dear Ms. Wieder,

The last fifteen utility trucks that Roeber's Plumbing has purchased have come equipped with Carter Industries Service Bodies. Having been in business for over 85 years, we at Roeber's value quality products that are professionally made to last. On a visit a short time ago to your modern production facility in Union City, California, I've seen first hand how your technicians use the state of the art equipment to construct a professional finished product that's "built to last"! From the design of the bodies, paint selection and even the unique way door seals are incorporated in the system, the package is complete from start to finish.

Additionally, the willingness of the company to customize many features is a plus and makes ordering a pleasant experience! Besides the large production department area, I was also impressed with your substantial showroom. All of your main products are displayed in a way to show what items are available and how they link to each other.

Keep up the good work! I know the next vehicle that Roeber's orders will have a Carter Industries Service Body installed on its chassis!

Regards,

John C. Roeber
President
