WHY KNAPHEIDE? BECAUSE RUST NEVER SLEEPS

When you buy quality Knapheide products, rust shouldn't be a worry. To provide the best protection against rust, we installed K-Coat, our state-of-the-art, custom-designed electrocoating prime paint system.

K-Coat is equivalent to the e-coat systems used by the major auto and truck manufacturers.

Because it bonds paint to steel by an electroplating process, any e-coat system gives you better corrosion protection than spraying. E-coat systems get prime paint everywhere in a product - including places that are impossible to reach using even the best spray techniques - and is absolutely consistent in thickness. Salt spray tests show that e-coating is far superior to spraying paint for inhibiting corrosion.

K-Coat results in a prime coat that provides excellent chemical and solvent resistance. Our K-Coat system is the best electrocoat prime paint system in the industry. Because rust never sleeps. And because you should never worry about the quality of your Knapheide product.
